

EUROCARGO - WHEELBASE 2790 MM

IVECO Eurocargo ML 75E/80EL/80E/90E/100E

DESCRIPTION

Solution developed by System Truck for the shortening of the wheelbase of the Eurocargo range vehicles, from 3105 mm to 2790 mm; with the aim of achieving an even more compact vehicle, perfect for all uses in urban areas.

The conversion is available for the models ML 75E/80EL/80E/90E/100E* with mechanical suspensions or rear pneumatic suspensions.

The wheelbase modification requires the repositioning of some components (air dryer, valve groups, air tanks) along the chassis and the replacement of the original battery box with a vertical, smaller one designed by System Truck.

TECHNICAL NOTES

Specifications of the vehicle for the shortening to wheelbase 2790 mm:

Model	IVECO Eurocargo ML 75E/80EL/80E/90E/100E* * only versions not suitable for towing
Suspensions	- (mechanical) or /P (rear pneumatic)

		base vehicle	transformed vehicle
Wheelbase (mm)		3105	2790
Turning diameters (mm)	wall to wall	12500	11800
	kerb to kerb	11100	10400

Body fitting dimensions must be checked each time with the subsequent bodybuilder according to the actual vehicle configuration.

The transformed vehicle can be fully tested by the Italian Ministry of Transport.¹

For any further information and to ask for custom designed solutions to meet your specific needs, please don't hesitate to contact our Technical Commercial Office:
