

CNG TANKS RACK

IVECO Daily 40C / 50C / 60C / 65C / 70C CNG

DESCRIPTION

Autonomy increase project developed by System Truck engineering in direct cooperation with IVECO, with the objective of further increasing the autonomy of the Daily with natural gas engine (CNG), for unlimited operation even in urban centres.

This conversion involves the installation of a rack of CNG tanks behind the cabin, which takes the total volume of tanks to more than double with respect to the base standard configuration.

TECHNICAL NOTES

This conversion can be completed on **Daily CNG 40C/50C/60C/65C/70C** monofuel vehicles, in combination with all tank configurations provided by the factory. It can be ordered directly from IVECO with the **CCM 71796** and is fully integrated in the IVECO logistics for delivery of the vehicle to the end user.

Installation of the **rack** is compliant with regulation R110. The rack is composed of 5 56 l tanks, totalling 280 l. The weight of the tanks rack is ~340 kg plus 44 kg of CNG.

The distance for the body limit is 1830 mm from the front axle.

The converted vehicle is homologated with II stage European homologation (**WVTA**) and is accompanied by the certificate of conformity (CoC) for incomplete vehicle¹.

For any further information and to ask for custom designed solutions to meet your specific needs, please don't hesitate to contact our Commercial Office: T +39 (0)376 1590804 commerciale@st-truck.com

¹ The vehicle must be completed by the bodybuilder in order to be registered.
